22. R. Paine	22	44. G. Carter	1

Delegate Voting Module™

The Delegate Voting Module™ is an add-on product for the OptionPower® audience response system. It is designed to fulfill the objectives of democratic decision and election processes by using OptionPower's powerful and efficient interactive polling systems.

If accuracy and time are important in your voting and election processes you will benefit from the precise and efficient capabilities of the Delegate Voting Module™. The time to prepare, administer and hand-count referendums and elections for officers and boards can consistently be reduced by more than 50%. You will achieve measurable cost savings while conducting an orderly election that satisfies participants' demand for speed and sophistication.

Key Features

Anonymous ballots - Give your voters the assurance that they can freely speak their minds without fear of tracking or recrimination. The software defaults to anonymous voting mode and all voting and referendum data is not trackable to any individual participant.

Accurate vote tallies - The participant voting devices are not able to "stuff" the ballot box or vote multiple times for a candidate. Each voter has an equally-weighted voice in the process and multiple votes and tampering are eliminated.

Fast vote results - Avoid the expense and time of preparing paper ballots and waiting for manual counts. Results are available within seconds of closing the vote. Your delegates and voters will appreciate the efficiency of the process and your ability to conduct a higher volume and quality of productive business.

Flexible ballots - Add or remove candidates from the ballot as easily as you edit a PowerPoint slide.

Multi-candidate offices - Quickly determine the top vote-getters for a multi-candidate office. You can see immediately if you have a tie or other condition that requires special action.

On-screen ballots - Eliminate the cost of printing and distributing ballots and other voting-related printed materials. The ballot is projected onto the screen(s) for all participants to see and can be edited up to the last minute if needed.

Recorded vote option - Use the roster tracking feature for situations where you need to track voting records, such as public and governmental bodies.

Export election data - Transmit results to an easy-to-use Excel file for record keeping and reporting needs.
